Professional Experience

Software Engineer, Fabrikod 07/2023 – present
(Remote)

- My primary responsibilities include developing various Flutter applications, such as Kindertrack, Kinderway, and Sleepybaby.
- Programmed multiple APIs using PHP Laravel for a large appointment management portal.
- Contributed to the development of the company's website by coding multiple pages using NextJS with Typescript, TailwindCSS, Redux Tool Kit, and RTK Query.
- Implemented various demanding features in Flutter such as background services, push notifications, live location tracking, and Google Maps customisations.
- Helping in the development of Cloud functions for the apps.
- Created video content for the company's Youtube channel.
- Leveraged team collaboration tools to facilitate an agile workflow.

Startup Co-founder & Developer, UniToni 06/2022 – 07/2023
(Remote)

- As one of the early founders of the UniToni startup, I played a pivotal role in shaping the startup's trajectory.
- Worked on applying a new structure for the codebase using Getx in Flutter.
- Programmed various features and connected it to the REST API.
- Suggested multiple adjustments and features for the application.
- App link for both Apple and Google stores: <https://unitoni.com>

Android Developer (Internship), ScrambleBit Software Solutions 08/2021 – 10/2021
Istanbul

- Worked on a native Android app for instant communications.
- Analysed the Software requirements and design.
- Integrated the front-end with Firebase Firestore, Storage and Authentication

Education

BSc. Software Engineering, Bahcesehir University 09/2018 – 08/2022
Cumulative GPA: 3.65/4.00 (High Honor) Istanbul

Minor in Business Administration 09/2019 – 09/2022
Cumulative GPA: 3.56/4.00 (High Honor)
